

Instructions for entering the apartment independently

At the entrance to the building at house number 8, on the intercom you must first dial the number **4** and then the button with the doorbell drawing. You have to wait 15/20 seconds and the door will open automatically. If the door does not open, repeat the operation. *To exit the building without keys, use the button on the wall to the right of the door (from inside)*

Enter the building and go up to the **1st** floor with the elevator. Exit through the glass door to the courtyard and go straight to the door with the "bamboo milano" sticker and the box with the code next to it as shown in the photo.

To open the box you must lower the black cap (from top to bottom) that covers the numbers, and dial your code which will be **3 0 7 4** after turning the black lever above. (After taking the keys, close the house and turn the lever to close it, when you check out you will have to leave the keys in there) it is your responsibility.

Inside the box there will be the keys to the apartment, open the door and **be careful when you enter so as not to fall, there is a step at the entrance to the room**. When checking out, lock up and leave the keys in the box, close it.

WE REMEMBER THAT CHECK OUT IS BEFORE 10:00am

- Inside the apartment you will find the "Apartment Manual" which explains everything you need for your stay. it is a must read as soon as you enter the apartment. This manual contains instructions for checkout, mandatory garbage separation and more.
- The box code is just for you, it is changed every booking.
- This is a private document, we recommend NOT printing it and it should not be left on the street or thrown away without being completely destroyed.
